

It's quick. It's easy.

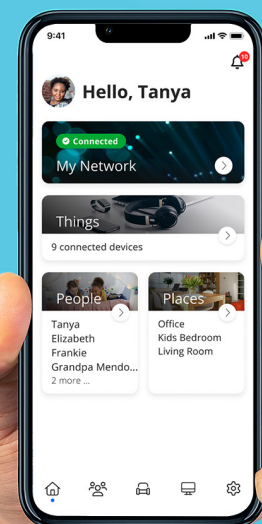

Managed Wi-Fi from Jamadots

✓ Free management app

✓ Prioritize your network

✓ Cyber threat protection

✓ Safer searches with
parental controls

Command IQ is a free app that allows you to view devices and manage your network at a basic level.

Enhance the Command IQ app with **Protect IQ** and **Experience IQ**—optional add-ons with big benefits for just \$5/month or even free with select packages.

The protection and control you need is as easy as...

1

Command IQ is a *free app* that allows you to see all the connected devices on your network, set up parental controls or a guest network, change your password, and more.

2

Protect IQ is an *app add-on* that provides a whole home network security system—free with our top Residential Fiber-Optic packages—that acts as a shield, protecting your devices from cyber threats starting at your router.

3

Experience IQ is an *app add-on* that monitors, prioritizes, and filters online traffic in your home network.

Command IQ ↓

Command IQ is a free app that gives you an instant snapshot of your home. Managing your home network has never been easier.

- View all connected network devices
- Set up parental controls or a guest network
- Change your password
- Only available on the Jamadots fiber-optic network

Protect IQ ↓

Protect IQ is your 24/7 internet watchman. Free for select packages (or just \$5/month), Protect IQ is a **Command IQ app add-on** that provides multi-layered protection for your most vulnerable devices like smart TVs, thermostats, and Wi-Fi cameras.

- No equipment required
- Does not replace anti-virus and malware protection on your specific devices

Experience IQ →

You set the rules—let Experience IQ enforce them. Experience IQ is a \$5/month **Command IQ app add-on** that ensures safe internet experiences and adequate bandwidth for your most important devices.

PROBLEM: You work from home and the kids' keep kicking you off the network.

SOLUTION: The **My Priorities** tool from Experience IQ eliminates disruptions by giving chosen devices priority over your bandwidth.

You can set schedules to send the bandwidth where it is needed the most and prioritize favorite devices to eliminate buffering.

PROBLEM: An innocent search results in an instant regret.

SOLUTION: The **Parental Controls** tool allows you to set screen time limits, block entire categories for apps and websites and add safe search to certain devices.

Create custom profiles and assign devices—even by room. Ready to activate Experience IQ and get power in the palm of your hand for just \$5/month?

The protection and control you need, **at a price you can afford.**

Command IQ App	Free for Jamadots fiber internet customers
Experience IQ (add-on)	\$5/month
Protect IQ (add-on)	Free with select packages* (or just \$5/month)
