

Protect IQ

Protecting you from cyber threats

A Command IQ app add-on from Jamadots

✓ 24/7 internet defense

✓ Personalized settings

✓ No equipment required

Protect IQ network security is like a 24/7 internet watchman.

With multi-layered protection, **Protect IQ** protects your most vulnerable devices like smartTVs, thermostats, and wifi cameras, stopping threats before they ever make it to your device.

This service does not replace antivirus for your computer. Only available on the Jamadots Fiber Optic network.

With **Protect IQ** all of your connected devices are protected. Enjoy peace of mind while we stop the intruders.

No equipment required: Protect IQ is integrated in your wifi router and used in the Jamadots Command IQ app.

Real people ready to help: Call your local Jamadots office for help: jamadots.com/contact

Complete protection: From thermostats, cameras, smartTVs, and baby monitors.

Home fortress: Protect IQ is constantly hunting for viruses, malware, and intrusions and stopping them at the front door.

Top-notch technology: Our world-class cyber security is updated daily to keep you safe.

FREE with select packages (otherwise just \$5/month)!
